

## Finding a New Group

- 1) Click on the “Groups” tab at the top of the screen. This will list the groups you are currently in and also provide a text box to type in the name of a group you are looking for.

- 2) If you are trying to find a group and you don't know the name, click on the “or discover a new group” link. If you leave the default settings as is and click the search button, you will see a list of **all groups** within SPEPconnect. To get a smaller list, change the parameters of your search by changing the given parameters.
